

This message is in regards to NAB's petition 04-160. I request that you allow satellite radio to be a major player in this market. In no way should satellite radio have restrictions limiting what they can and will provide. As a traveling sales person I depend on Satellite radio to provide up to the date info anytime I may need such. This ammendment is ridiculous and against fair trade laws. I urge you to vote against this ammendment and send a strong message to the NAB. Thanks for your time and attention. John R. Eaton
